

redhat.

20 October 2009

To whom it may concern:

The Fedora Project is a Red Hat sponsored and community supported open source project. Its goal is to work with the Linux community to build a complete, general purpose operating system exclusively from free software. That operating system and platform, Fedora, is based on Linux and is free for anyone to use, modify and distribute. It is developed by a global community and is sponsored by Red Hat, Inc.

The Fedora CDs and/or DVDs accompanied by this letter are loaded with software in the public domain and that is free for anyone to use or distribute. The value of the CD and/or DVD is de minimis. For shipping and insurance purposes, we declare the value of each CD/DVD as USD \$0.15.

These installation media are not imported for commercial purposes, and we believe that no import duties should be imposed.

With any questions, please do not hesitate to contact me.

Regards,

Dennis Duquette
Vice President, Tax
Red Hat, Inc.
