

# AutoQA

Better living through automation

Presented by  
James Laska  
Fedora QA

# Today's Topics

---

1. Refresher
2. Current status
3. I want a pony
4. Questions?

Refresher

# Refresher

---

- Rawhide Acceptance Tests (rats)
- Event-driven scheduling (push & poll)
- Relies on autotest -  
<http://autoqa.fedoraproject.org>
- Package Update Acceptance Plan
- Test results
  - [autoqa-results@lists.fedorahosted.org](mailto:autoqa-results@lists.fedorahosted.org)
  - [%{package}-owner@fedoraproject.org](mailto:%{package}-owner@fedoraproject.org)

Current status

# Current status

---

- Post-tree-compose
  - rats\_install
- Post-repo-update
  - Repoclosure, conflicts, rats\_sanity
- Post-koji-build
  - initscripts, rpmsguard, rpmlint, anaconda\_storage, compose\_tree

# Current status

---

- Post-bodhi-update[-batch]
  - Upgradepath, depcheck (permissive)
- Git-post-receive
  - anaconda\_checkbot

Pony?

# Pony?

---

- Autoqa-0.5
  - Depcheck enforcement
  - Resultsdb
- Autoqa-?
  - Automate installation test plan
  - Fedora message-bus
  - <insert your tests here>
