What type of devices will your installation involve?

- **Basic Storage Devices**
  Installs or upgrades to typical types of storage devices. If you're not sure which option is right for you, this is probably it.

- **Specialized Storage Devices**
  Installs or upgrades with devices such as Storage Area Network (SAN) devices or mainframe attached disks (DASD), usually in an enterprise environment.
At least one existing installation has been detected on your system. What would you like to do?

- Fresh Installation
  Choose this option to install a fresh copy of Fedora on your system. Existing software and data may be overwritten depending on your configuration choices.

- Upgrade of an Existing Installation
  Choose this option if you would like to upgrade your existing Fedora system. This option will preserve the existing data on your storage device(s).

Which Fedora installation would you like to upgrade?

Fedora 10 (located at /dev/VolGroup00/LogVol00)
Please select both the drives you'd like to install the operating system on and any devices you'd like to automatically mount to your system below:

<table>
<thead>
<tr>
<th>Model</th>
<th>Capacity</th>
<th>Vendor</th>
<th>Connection</th>
<th>Serial Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSD SATA</td>
<td>40 GB</td>
<td>SanDisk, Inc.</td>
<td>SATA</td>
<td>NP0JT4C2FUWY</td>
</tr>
<tr>
<td>ST9160824AS</td>
<td>80 GB</td>
<td>Seagate</td>
<td>IDE</td>
<td>5MACH5AT</td>
</tr>
<tr>
<td>ST9160824AS</td>
<td>80 GB</td>
<td>Seagate</td>
<td>IDE</td>
<td>5JXGCL92</td>
</tr>
<tr>
<td>Mini TravelDrive</td>
<td>4 GB</td>
<td>Memorex</td>
<td>USB</td>
<td>000AEB91EC06C930A30E</td>
</tr>
</tbody>
</table>

3 devices (200 GB) selected out of 4 devices (204 GB) total.

Tip: Selecting a drive on this screen does not necessarily mean it will be wiped by the installation process. Also, note that post-installation you may mount drives you did not select here by modifying your /etc/fstab file.
Which type of installation would you like?

- **Use All Space**
  Removes all partitions on the selected device(s). This includes partitions created by other operating systems.
  Tip: This option will remove data from the selected device(s). Make sure you have backups.

- **Replace Existing Linux System(s)**
  Removes only Linux partitions (partitions created from a previous Linux installation). This does not remove other partitions you may have on your storage device(s) (such as VFAT or FAT32 partitions).
  Tip: This option will remove data from the selected device(s). Make sure you have backups.

- **Shrink Current System**
  Shrinks existing partitions to create free space for installation. *(My guess at what it does, anyway.)*

- **Use Free Space**
  Retains your current data and partitions and uses only the free space on the selected device(s), assuming you have enough free space available.

- **Create Custom Layout**
  Manually create your own custom layout on the selected device(s) using our partitioning tool.

- Review and modify partitioning layout.
Which storage device would you like to boot this installation from?

<table>
<thead>
<tr>
<th>Bootable</th>
<th>Model</th>
<th>Capacity</th>

<td>000AEB91EC06</td>
</tr>
</tbody>
</table>

- Create encrypted filesystem(s)

Is there anything about selecting a boot device that we should have a tooltip for? Any warnings or implications or sticky situations to know about? Should this screen go before the previous one? My thought was at you're replacing an existing system you use the same boot device as before.
